9. MISSION READOUT:

A PROBABLE LONG RANGE SAM (PLRS) LAUNCH COMPLEX HAS BEEN IDENTIFIED AT KAPUSTIN YAR/VLADIMIROVKA MISSILE TEST CENTER. THE COMPLEX IS LOCATED 12 NM EAST OF KAPUSTIN YAR AND APPROXIMATELY 72 NM ENE OF THE VOLGOGRAD PLRS LAUNCH COMPLEX. IT IS IN AN EARLY-TO-MID-STAGE OF CONSTRUCTION AND CONSISTS OF 2 LAUNCH SITES, DESIGNATED A AND B, AND 2 MOUNDED RADAR POSITIONS WITH A CENTRAL CONTROL AT THE TRACKING/GUIDANCE FACILITY. CONFIRMATION OR NEGATION OF RAILS IS NOT POSSIBLE DUE TO HEAVY SNOW COVER.

THE LAUNCH SITES AND THE TRACKING/GUIDANCE FACILITY APPEAR NEARLY IDENTICAL TO LAUNCH SITES B AND C AND THEIR CORRESPONDING RADAR POSITIONS AT THE VOLGOGRAD PLRS COMPLEX. THE AZIMUTH OF A PERPENDICULAR BISECTOR OF A LINE CONNECTING CONTROL CENTERS A AND B IS 201 DEGREES (PLUS OR MINUS 5 DEGREES). THE COMPLEX DOES NOT APPEAR SECURED. A POSSIBLE CONSTRUCTION SUPPORT AREA IS LOCATED NORTH OF SITE B.

THE COMPLEX CAN BE NEGATED ON [REDACTED] AND WAS FIRST SEEN IN A VERY EARLY STAGE OF CONSTRUCTION ON [REDACTED] LAUNCH POSITIONS B-2, 5 AND 6, BOTH CONTROL CENTERS AND THE TRACKING/GUIDANCE FACILITY WERE PRESENT. NO MISSILES OR MISSILE-RELATED EQUIPMENT OBSERVED.

These notes have been prepared for briefing purposes only and should not be used for detailed analytical work. Their use should be restricted to the particular briefing board(s) they were prepared for and must be considered valid only for the reporting period as indicated by the date of issue. For information concerning these notes contact Chief, Collateral Support Division, NPIC.
